**Fundamental Product Structure for
Colour-Coated Galvalume**

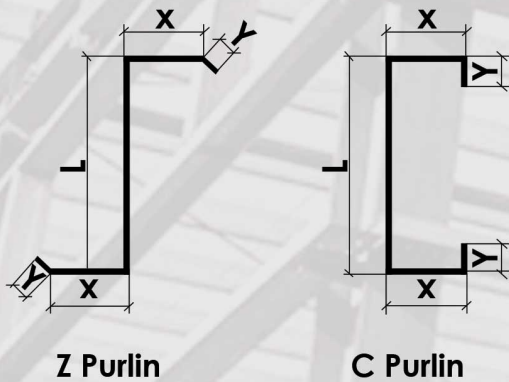

- A Cold rolled steel substrate
- 1 Al - Zn alloy steel
- 2 Pre-treatment (Chromating)
- 3 Primer
- 4 Top Coat
- 5 Backer Coat

PURLINS

BM C&Z Purlins are most inevitable part of modern steel buildings used as framing and support members in roofs and wall. They are ready to use Purlins & Girts roll formed from high strength galvanized steel or HR steel sourced from primary steel producers, pre punched and cut to length as per required dimensions or design. Thus providing an efficient, lightweight and economical product to Engineers, Fabricators & PEB manufacturers. Above all these, Bansal Metallics stringent quality standards and latest manufacturing facility enhances product quality and user satisfaction beyond expectations.
